Comments:

Generally there are good responses from the students. Students are positive about the course, its contents and layout. However, some student have experienced the course to be difficult which is quite

Analysis

Unfortunatly, only a few (7) students have participated in the evaluation which narrows the analysis grounds. However, the evaluation results are very satisfactory which talks for the good quality of the course. The course has been given in several years and it has undergone improvements constantly.

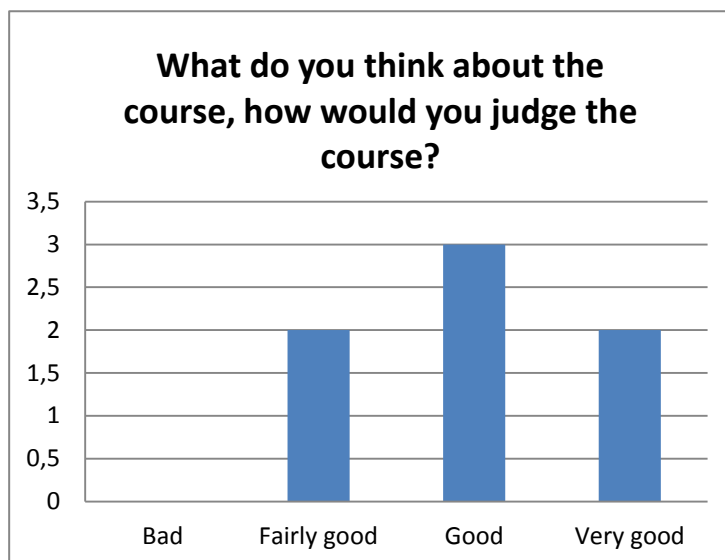

Action plan

No immediate action is required. However, improvements in form of more videolektions and update of its contents will take place as a normal procedure.
